EDUCATION

FAE Centro Universitário Graduação em Sistemas para Internet, Tecnologia da Informação · (2013 - 2015)

EXPERIENCE

Software Engineer

Welbe Care | Dezembro 2021 - Present

An American startup that provides complete ecosystem well-being for your employees. The Welbe provides an app, telemedicine, RH portal, companies portal, doctors portal, and dashboards.

I've been working on developing solutions front-end all portals, delivering new solutions, to well-being of employees and management.

Technologies: React, Next.js, Context API, Hooks, Styled Components, HTML, CSS, SCSS, Rest API, agile methodologies, AWS, Azure.

Squad Leader / Software Engineer

Banco Bari | Outubro 2020 - December 2021

Banco Bari a promising bank at Brazil. Aiming change the form that Brazilian deal with the money. First of all I worked with the website institucional of company (www.bancobari.com.br), making all redesign and reconstruction. There where all clients, leads, and partners have the contact with us. I've had making fix and managing the B2C loan site, legacy site and reissue bills of loans.

After only 6 months I was promoted to Squad Lead and took a new challenge. Manager a Squad with ten people and solve problems, how project deadline, quality of product and so on. In this Squad we were responsible for a system that partners (B2B) using to get new loans to your clients and manage proposals. We reconstructed all with Next.js and taking off the legacy in Angular. We create a storybook for all web projects, aiming to keep the design and maintenance patterns.

Technologies: React, Next.js, Context API, Hooks, Styled Components, HTML, CSS, SCSS, Rest API, Angular, agile methodologies, AWS.

SOFTWARE ENGINEER

EXPERIENCE

Senior Software Developer

Monditech | Junho 2020 - Outubro 2020

Monditech is a software factory focused on ERP systems. The main activity is to develop new resources to Fluig, a TOTVS ERP.

Where was my first experience with microservice, application gateway and components. Every new feature we developed was a new component for reuse when needed. We created the Storybook to centralize the components. The mindset was to separate all components to reuse all parts of them. My responsibility was to analyze, develop and share my knowledge with the team.

Technologies: Vue.js, JavaScript, HTML, CSS, SCSS, JQuery, Rest API, Node.js, Java, agile methodologies, AWS.

System Analyst | Developer P

uCondo | Julho 2018 - Junho 2020

UCondo is a promising startup in condominium management. That application allows the management of the entire condominium, apartments, meetings, maintenance, appointments, bills, taxes and so on. I was responsible for analyze, develop and implement new solutions, web and mobile. I did analysis with clients, developed new features, implementation and documentation.

Technologies: JavaScript, HTML, CSS, SCSS, Rest API, Java, agile methodologies, Genexus, Postgre, SQL Server.
